

I do not think the Federal Communication Commission should overturn New Jersey and other states' Do Not Call laws that are stronger than the federal program. This program has been very successful as eliminating the annoying and sometimes threatening phone calls to people at all hours of the day. I believe that New Jersey has a very good law and want to keep it that way. I agree with Governor Codey who is adamantly opposed to any weakening of the program.

Please do not change anything relating to this law in New Jersey.
